Narratives of witness. Autobiographical accounts by patients or by their family members or friends can also be important for medical ethics. 14 These works can have considerable value as narratives of witness. Some of these narratives offer commentary from the patient's point of view on such ethical issues as autonomy and respect for persons, truth telling and informed consent, beneficence ...

Ethical Dilemma. An ethical dilemma arises when a person is forced to decide between two morally sound options, but they may conflict with the established boundaries of a business, a governmental agency, or the law. Some ethical dilemmas may involve following the truth versus being loyal to a friend; following the laws or rules versus having compassion for an individual's plight; and ...

The narratives are presented in the broad classifications of ethical or moral drift. A third classification lists narratives which contain inferences to conflict of interest as there was evidence that on occasion what and how the nurse documents can be influenced more by a nurses' own year-end performance evaluations than by what was true or by what actually occurred.
