API guide | Alfresco Documentation

Alfresco makes it easy for people to quickly locate the exact document they need from among many thousands, even hundreds of thousands of files, in their document management system. Powerful search features, including instant search suggestions and the ability to apply filters to speed the retrieval of relevant content

Document Management Software | Alfresco

Swagger provide a rich framework to automatically produce API documentation by adding specific Java annotations to controllers but I don't find a way to use this framework with Alfresco WebScript. Furthermore, we would like to easily use the "API first" approach (API First approach with Swagger) in our ACS-based projects so it would be also really important for us to find a way to produce REST APIs from the Swagger documentation files.
