8th Grade Math Review Packet - Functions and Slope by ...

Description. This resource is a digital review packet for 8th grade math that includes 18 problems related to functions, slope, and systems of equations It includes 3 pages of problems designed to help students review these 8th grade concepts. A full list of the topics is below. An answer key is included. *Note: This packet includes the same problems as my 8th Grade Math Review Packet - Functions and Slope.

Module 7 Review Packet - Modules: MAT 092

Review Packet Answer Key 1) If the data is curved, a linear model doesn't fit the data even if the correlation is strong. The data must be linear for a regression line to be useful and looking at the scatterplot is necessary to make that determination. 2) It means the cloud of data points is elliptical (oval shaped) meaning a line fits the data.
