Score conversion-CogAT by Laurie Ann Lawrence

Age norms span from 4 years and 11 months through 18 years old, in which students are grouped in one month intervals. Age and grade scores will often be very similar. However, using age norms can be more accurate when assessing children who are very young or old for their grade level. Scores for the CogAT are calculated in a number of steps.

Frequently Asked Questions about the CogAT Exam

the same raw score (number correct) on the test will result in a higher GPR using the updated norms. The largest change from the 2011 to 2017 norms occurs for the Grade 1 fall Quantitative norms and the Grade 12 (fall and spring) Nonverbal norms, where the difference is 5 to 6 GPR points. For both grades, these differences occur at or below the ...

Age norms span from 4 years and 11 months through 18 years old, in which students are grouped in one month intervals. Age and grade scores will often be very similar. However, using age norms can be more accurate when assessing children who are very young or old for their grade level. Scores for the CogAT are calculated in a number of steps.

CogAT Test (Cognitive Abilities Test) - TestingMom.com

CogAT scoring is based on your child's age (not grade level). Your child will receive what's called an SAS, or "Standard Age Score," which compares your child's score against other children in the same age range. The highest SAS that a child can receive on the CogAT is 160, while 100 is considered to be an average score.

CogAT Scores | Understand Your Child's Results ...

This Cogat Norms test did an excellent job of preparing my son for simple test taking, so that the actual Cognitive Test could assess his IQ and ability, and not his familiarity with a convoluted testing format, or certain types of questions! He said it was also "fun" too, which was a shocker.
