~~Translational Research—an overview | ScienceDirect Topics~~

One of the major tasks for evaluators involved in translational research is to help assess efforts that aim to reduce the time it takes to move research to practice and health impacts. Another is to assess efforts that are intended to increase the rate and volume of translation.

~~(PDF) Evaluating Translational Research: A Process Marker ...~~

A translational research idea can start at any point in the framework, move in any direction, and potentially skip entire rings. New findings lead to new questions that can start the whole translational research process over again. Many translational research stories are told in retrospect.

~~TIG Home—American Evaluation Association~~

Evaluation of translational research should focus on identification of key operational and measurable markers along a generalized process pathway from research to practice. Skip to page content Objective Analysis.

~~Evaluating Translational Research A Process~~

A major task for evaluation of translational research is to identify better process models for translation (regardless of local definitions of “T” phases) and explore which measures might be most feasible, useful, and highest in quality for evaluating progress throughout these processes.

~~Evaluating Translational Research: A Process Marker Model ...~~

Objective: We examine the concept of translational research from the perspective of evaluators charged with assessing translational efforts. One of the major tasks for evaluators involved in translational research is to help assess efforts that aim to reduce the time it takes to move research to practice and health impacts.

~~Evaluating Translational Research: A Process Marker Model ...~~

Academia.edu is a platform for academics to share research papers.

~~Evaluating Translational Science—Cornell University~~

Translational research 1. Evaluating Translational Research: A Process Marker Model William Trochim , Ph.D. □ Translating knowledge gained from laboratory science... 3. The aim of translational research is to produce new: •Therapeutics •Medical devices •Tools... 4. The Translation Continuum ...

~~Evaluating Translational Research: A Process Marker Model ...~~

One of the major tasks for evaluators involved in translational research is to help assess efforts that aim to reduce the time it takes to move research to practice and health impacts. Another is to assess efforts that are intended to increase the rate and volume of translation.

~~Nicholas Family Foundation Translational Research Unit~~

Translational Research. Translational research is a dynamic continuum from basic research through application of research findings in practice, communities and public health settings to improve health and health outcomes. Translation Research progresses across five phases: Preclinical and animal studies (T0/Basic Science Research)

~~Translational research—SlideShare~~

Other concerns center around how we evaluate the translational research process so that we can shorten the length of time for research to progress from discovery to patient care. 2 However, we do not yet know how individual investigators approach their research programs with regard to the translational continuum. Do they translate their ...

~~Tracking & Evaluation: Center for Translational Medicine ...~~

Translational research is a bidirectional process that involves multidisciplinary integration among basic, clinical, practice, population, and policy-based research. The goal of translational research is to speed up scientific discovery into patient and community benefit.

~~Translational Research—Bronfenbrenner Center for ...~~

The Center for Translational Medicine (CTM) relies on systematic evaluation of programs, resources and services, and translational activities to assess its progress toward improving efficiency and effectiveness along the translational science spectrum: moving research concepts from basic science to clinical studies and population health outcomes.

~~Towards an alternative framework for the evaluation of ...~~

The process of translational research (TR) connects researchers, practitioners, policymakers and community members in various combinations with the purpose of creating better research, policies, programs and practices. The TR process can be applied to any area of study, any community issue or program or any governmental policy creation process.

~~Translation Research in Practice: An Introduction~~

Prof. Trochim's research is concentrated in the general area of evaluation and research methodology. His research is broadly on the development and assessment of new evaluation and research methodologies and their use in managing and enhancing social policies and programs.

~~Characterization of Investigators' Approach to ...~~

The groups involved in the translational process have cognitive differences, are institutionally separate, and, therefore, follow different rules, are faced with different types of incentives, and often are geographically dispersed. The definition of an initiative and its evaluation must be flexible and allow for...

~~Evaluation Research | Research Methods Knowledge Base~~

14. Develop translational research pipeline evaluation. 15. Develop and implement initial researcher survey. 16. Develop and implement network analysis. 17. Collect and report annually on milestones. 18. Collaborate on National CTSA Evaluation Committees. 19. Annual Evaluation reporting LONG - TERM MILESTONES

~~Expanding the Concept of Translational Research: Making a ...~~

Evaluation Research; Evaluation Research. One specific form of social research – evaluation research – is of particular interest here. The Introduction to Evaluation Research presents an overview of what evaluation is and how it differs from social research generally. We also introduce several evaluation models to give you some perspective ...

~~Evaluating Translational Research: A Process Marker Model~~

Translational research evaluation is focused on the idea of evaluating the progress of research through the translational research process - which typically includes moving from the basic research, through applied research, and on to some form of impact on a population - which might be a clinical treatment, a policy, a public health intervention or an economic impact.

~~Evaluating Translational Research: A Process Marker Model ...~~

The Nicholas Family Foundation Translational Research Unit (TRU) is a special nursing unit on the third floor of the Clinical Cancer Center. Staffed by specially trained research nurses, the clinical space is designed for the optimal care of patients in clinical trials.
