Ways to generate your own power. There are many different methods of generating your own power or heat at home. Find out more about methods you could use to save money on your bills or even contribute power back to the grid. Solar. You can harness the power of the sun to generate electricity and heat your water.

~~10 Easy Ways to Lower Your Electric Bill~~

Over-simplified, you will spend less money on your electric bill but transfer the cost over to propane. I also hope you are not using your grill for anything other than cooking outside. Bringing a grill indoors to cook is dangerous, and incredibly irresponsible if you are using it to assist in heating your home. Please be safe.

~~Generating your own power | Greener Scotland~~

Depending on your interests, you can make static electricity in several different ways. To make small shocks, you can rub your socks against carpet or rub fur against plastic wrap or balloons. Or, to produce larger shocks, you can build your own electroscope using objects around the house.

~~How To Make A Electric Scooter At Home~~

To build an inexpensive electric bicycle, you'll need a bike with front-disc brakes and wide handlebars, an electric bicycle conversion kit, and a 36- or 48-volt battery. Once you have your supplies, start by putting the tire from the old bike wheel on the new wheel with the hub motor that came with your conversion kit.

~~How To Make Your Electric~~

One of the best ways to make your own electricity is through solar energy. Start by investing in 2-3 solar panels and have them mounted in a sunny area, such as a rooftop. Consult a professional about installation for the panels, and create a thorough budget that will help you maintain the system.
