A MODEL OF LEARNER-CENTERED APPROACH AND BEST PRACTICES IN DISTANCE EDUCATION. Georgine K. Fogel, Fairmont State University. ABSTRACT. The paper examines critical issues in web-based distance education including the changing role of faculty and students, instructional design for quality education, outcomes assessment, and administrative support.

Model-Centered Learning: Pathways to Mathematical Understanding Using GeoGebra is the first book to report on the international use of GeoGebra and its growing impact on mathematics teaching and learning. Supported by new developments in model-centered learning and instruction

*Influence of GeoGebra on Problem Solving Strategies in ...*

Model-Centered Learning: Pathways to Mathematical Understanding Using GeoGebra is the first book to report on the international use of GeoGebra and its growing impact on mathematics teaching and learning.

*What Is Blended Learning? - Aurora Institute*

To realize the guided-pathways model, faculty and staff would create sequences of courses that lead to clearly defined outcomes. And this major restructuring of the curriculum would provide direction for other significant institutional reforms that will aid in retention and completion.

Student-Centered Learning. The term student-centered learning refers to a wide variety of educational programs, learning experiences, instructional approaches, and academic-support strategies that are intended to address the distinct learning needs, interests, aspirations, or cultural backgrounds of individual students and groups of students.

Abstract. But common as it is, much of education clings too stubbornly to abstraction, without enough models to illustrate and enliven them. The cure for this on the learner's side is to call for more models. Learners need to recognize that they need models and can seek them out.

The most important component of the definition is the “element of student control” emphasizing the shifting instructional models to enable increased student-centered learning, giving students increased control over the time, place, path, and/or pace of their learning pathways.

*Essay on challenges facing the guided-pathways model for ...*

The ILN Logic Model framework focuses on five major areas to create deeper learning centered on students: 1) college- and career-readiness, 2) personalized learning and workforce preparation, 3) a balanced system of assessment, 4) an aligned accountability system, and 5) seamless pathways for all students to achieve college- and career-readiness.

Model-Centered Learning Pathways to Mathematical Understanding Using GeoGebra Series: Modeling and Simulation for Learning and Instruction, Volume: 6

*What Is Learner-Centered? | Acrobatiq*

Learning pathways intersect with strategies such as authentic learning, personalized learning, and student-centered learning, among others, which generally seek to expand or change the instructional approaches schools use to educate students.

Join the Pathways 2.0 Facebook group. An active closed group where Adventist teachers collaborate, share teaching ideas and strategies, and ask questions of Pathways 2.0 experts. biblically-based curriculum is built on the Adventist worldview and the belief that Christ is the model teacher.

*Geogebra for Model-Centered Learning in Mathematics ...*

The core of the LCM [Learner-Centered Model] is that all instructional decisions begin with knowing who the learners are – individually and collectively. Instructors need to take into account who they are teaching. Each student comes to class with their own past—academically and experientially. They also come with their own goals.

*Learning Pathway Definition - The Glossary of Education Reform*

Customized professional learning pathways leading to the articulation of strong learner-centered outcomes, supporting educators in developing effective instructional practices, and creating the enabling conditions that result in transformative change.

*Model-Based Teaching - SimScientists*

The learning devices produced from this research are: Learning Implementation Plan (LIP), Teacher's Book (TB), Student's Book (SB), Student Worksheet (SW) and MCS test. The results of the research are: (1) the DLSG-based learning devices developed have met the validity, practicality, and effectiveness criteria; (2) there is the improvement in MCS of the students taught through DLSG.
