SADS - SADS Foundation

Sudden death in people younger than 35, often due to undiscovered heart defects or overlooked
heart abnormalities, is rare. When these sudden deaths occur, it's often during physical activity,
such as playing a sport, and more often occurs in males than in females.

Touch of Death - Wikipedia

The QT interval is measured from the beginning of the QRS complex to the end of the T wave on a surface electrocardiogram and represents the period from onset of depolarisation to completion of repolarisation of the ventricular myocardium.¹ The interval varies greatly and is affected by age, sex, sympathetic tone, and diurnal pattern.² Because it increases as heart rate falls, measurements of ...
